

## Personal Details:

Name: Harrison Royds

Phone Number: 07808 037487

Email: harrisonroyds@gmail.com

Location: Southport, Merseyside.

GitHub: Harrison365

Portfolio URL: <https://harrison-r-portfolio.netlify.app/>

## Personal Statement:

When trying to decide upon a career path, I knew that there were some key elements I was looking for. I wanted to be in a sector which was growing and on the cutting edge of technology. I wanted to be part of a positive team, which was working towards a common goal and supported one another, whilst allowing for independent growth too. This is when I discovered the world of software-developing. I jumped at the opportunity to take part in a coding boot camp scholarship scheme and have been trying to expand my knowledge and skills ever since. I am excited to find an equally enthusiastic team working on new projects that I can contribute to and learn from.

## Technical Skills:

Language: JavaScript;

Front End: React, React-Native, CSS (SCSS), HTML, Node.js;

Backend: Express, PostgreSQL, Firebase, Node.js;

Testing: Jest;

Version Control: Git, GitHub;

Command Language Interpreters: Bash, Zsh.

## Experience:

- Northcoders Coding Bootcamp – An intensive 13-week full-stack coding training course (January-April 2022)
- Comprehensive Portfolio: For all the projects below, including GitHub repositories, hosted applications, and more applicant information, please visit my portfolio page. A front-end built using React with UI/UX as its focus.  
GitHub: <https://github.com/Harrison365/Portfolio>  
Portfolio Website: <https://harrison-r-portfolio.netlify.app/>
- Back-End Project - NC News: A fully seeded database with Model-View-Controller software design allowing front-end access. Test-driven development was used throughout with SQL and error-handling knowledge showcased.  
GitHub: <https://github.com/Harrison365/NC-News-Back-End>  
Hosted: <https://nc-news-be-hr.herokuapp.com/api>

- Front-End Project - NC News: A React-based front-end allowing access to articles, their comments and other information from the back-end project, above. A liking, commenting, deleting, and sorting systems are included. React hooks, styling and error-handling are showcased.

GitHub: <https://github.com/Harrison365/NC-News-Front-End>

Hosted: <https://nc-news-front-end-hr.netlify.app/>

- Team Project: - UpShift: A React-Native/Firebase full-stack social media app allowing users to find fellow motorbike enthusiasts in their area. Including a messaging service and route planner.

GitHub: <https://github.com/Harrison365/UpShift> (Includes Demonstration Video)

- Southport & Ormskirk Hospital NHS Trust Finance and Procurement Team: - Experience using Oracle systems for invoice sorting and approval (July-December 2021).

## **Education:**

### **Degree:**

- First Class Bachelor's Degree in Biology from the University of Leeds

### **A-Levels:**

- Biology, A
- Chemistry, B
- Geology, A
- AS Mathematics, A

### **GCSEs:**

- 6A\*s (Mathematics, ICT, Biology, Chemistry, Physics, Geography), 5As (English Literature, Statistics, Religious Education, Physical Education, Classical Civilisations), 2Bs (English Language, French).
